RE: Plan of Pennsylvania Licensed Racetracks to Continue Professional Sports Team Operations at its Physical Locations

To Whom It May Concern:

Thank you for developing and submitting the plan by which you would like to resume activities at Pennsylvania Licensed Racetracks. These plans are necessary to mitigate the spread of COVID-19 as facilities re-open or continue to operate.

Professional sports, defined as any sporting event at which the participants are paid by a league or team, or at which individuals or teams receive prizes or purse, are allowed to practice or play in the yellow and green phases of reopening if the team (or league on behalf of the team) has developed a COVID-19 safety plan. The plan must include, at minimum, a process for testing or screening for COVID-19, and monitoring all on-premises attendees. In the yellow phase, no fans or spectators are allowed in or directly outside of the site or venue.

In response to your plan to mitigate risks of COVID-19 exposure within your professional sports team operations, pursuant the Department's legal authority to prevent and control the spread of disease, it has been determined that the organization identified above is permitted to play or practice if all measures set forth in your organizations plan are implemented and maintained.

Sincerely,

A handwritten signature in black ink, appearing to read "Rachel L. Levine".

RACHEL L. LEVINE, M.D.
Secretary of Health
